

Meeting Agenda

Date: 2015-05-13

Facilitator: Erik Forsberg

Participants: Erik, Patrik, Michael, J

1. Objectives (5 min). Resolve any issues preventing the team to continue.

There's a minor problem with getting a table from a stored local database (derby).
Connecting to the local embedded database is fine, but fails to retrieve a table from it.
Still looking more into it!

This error still exists as of 2015-05-13

2. Reports (15 min) from previous meeting

The model now works with interfaces. Mock classes added for testing. GUI
Improvements (Look and feel).

3. Discussion items (35 min)

Discussed how to build the week view. This is the most complex part visually and we
had a few ideas on how to implement this i swing. Discussion on whiteboard.

4. Outcomes and assignments (5 min)

Michael: Fix database issue if possible and start to plan for the Month View.
Patrick: Start coding on weekview and activity element.
Erik: Assist patrick and continue to improve model.
Johan: Adapt test to new model/interface changes.

5. Wrap up

- Write down unresolved issues for next meeting

N/A

- Time and location for next meeting

Next week, no decided date or time yet.
