

Meeting

Date: 31st March 2015

Facilitator: Patrick

Participants: Erik, Johan, Michael, Patrick

1. Objectives (5 min). Resolve any issues preventing the team to continue.

There were no issues, that prevented us from continuing.

2. Reports (15 min) from previous meeting

Everybody is reporting what he has thought about over the weekend (USE-cases, GUI, classes etc.)

3. Discussion items (35 min)

We're discussing the RAD and functional requirements and made a list of 20 functional requirements (see RAD).

We're also discussing the GUI of the application and have now a good idea, how the application is supposed to look like.

Finally we're writing down classes, which we think we're going to use/need to prepare the UML-diagram.

4. Outcomes and assignments (5 min)

Erik and Michael are working on the UML-diagram.

Erik is also working on the RAD.

Everybody will create a GUI-mockup with the different views etc. until Thursday.

5. Wrap up

Next meeting will be on Thursday 2nd April 2015 at 12:00h instead of the usual Friday-meeting.
