

## Meeting Agenda

Date: 2015-04-21

Facilitator: Michael Tran

Participants: Erik, Michael, Johan, Patrik

1. Objectives (5 min). Resolve any issues preventing the team to continue.

No preventing issues to handle.

2. Reports (15 min) from previous meeting

Erik and Johan have been implementing the first essential classes for our application. Michael has been working on implementing listeners (in the controller) for the views. Patrick kept on working with the GUI.

3. Discussion items (35 min)

Maybe add a class named ActivityGroup/ActivityCategory?  
Should Contact (class) have a reference to ContactGroup?  
Might cause circular dependencies, but could have a List containing the names (String) of the ContactGroup it belongs to.

4. Outcomes and assignments (5 min)

Everyone should continue with their work to get something runnable/testable for the next supervision. Michael should start working on sequence diagrams for 2 use cases.

5. Wrap up

Ask the supervisor how to handle possible circular dependencies with Contact and ContactGroup.

- Time and location for next meeting:  
Ideläran 5 12.00 Thursday 23/4
