

Meeting Agenda

Date: 2015-05-26

Facilitator: Michael Tran

Participants: Erik, Patrick, Michael, Johan

1. Objectives (5 min). Resolve any issues preventing the team to continue.

N/A

2. Reports (15 min) from previous meeting

The database for the application is working, and data access objects (DAO) are used for retrieving and storing data. Not all functionality on the database has been implemented though. Creating and listing alarms is now working. Weekview now correctly displays the weekdays, but still needs some work on displaying activities in this view.

3. Discussion items (35 min)

We need to notify the user when the time for an alarm is equal to the current time. We chose to display a simple dialog with an OK button, but we need to frequently check the alarm time with the current time, somehow.

4. Outcomes and assignments (5 min)

Michael: continue with implementing the database functionalities (Alarm, Notification).

Patrick: edit view for activity.

Erik: work on the month view.

Johan: edit and delete buttons for listview (Alarm).

5. Wrap up

- Write down unresolved issues for next meeting

N/A

- Time and location for next meeting

Wednesday 27/5 12.00
