Meeting Agenda

Date: 24-03-15, 10:00 – 12:00

Facilitator: Johan Ben Mohammad

Participants: Johan, Patrick, Erik, Michael (For now, group 40)

1. Objectives (5 min). Resolve any issues preventing the team to continue.

We have decided to have meetings twice per week (excluding holidays).
Tuesdays 11:45 - 13:15 and Fridays 10:00 – 11:45.

We have made a domain on *Slack.com* in order to have a slim communication
between each other when it's not meeting times.

2. Reports (15 min) from previous meeting

This is the absolute first meeting, so nothing has been discussed from
here.

3. Discussion items (35 min)

Ideas that has been mentioned:
- Bomberman (A game)
  Fun. Easy to implement. Many parts need to merge together. Logic &
  Parallelism needed.
- Calendar
  Not so fun. Can get update. You can do it in any way with any
  interface. Sounds like something they want from this course.
- Advanced calculator
  A little bit like the calendar. Coordinates have to be converted.
  Many plug-ins will probably be used.

4. Outcomes and assignments (5 min)

Since it got very hard to decide what we wanted to do, we ranked the
choices from 1 (the best) to 3 (the least good one).

Name	Johan	Patrick	Erik	Michael	**TOTAL**
Bomberman	2	3	2	1	8
Calendar	**3**	**1**	**1**	**2**	**7**
Calculator	1	2	3	3	9

We have also prepared together with our personal information that has been
sent to the examinator, together with our idea of a Calendar.

For future meetings, we will be using Google Docs so that everybody can
check out how our meeting documents gets modified by the time.

5. Wrap up

Every member will be thinking out a couple of functions that could be used
and/or excluded for this project before the next meeting now on Friday
(27/3). Everybody will check up Git and Maven individually for the next
meeting.

Time and location for next meeting: Friday 27/3, 10:00 – 11:45, "Idéläran,
grupprum 5".
